

LEVEL TRANSMITTERS

DATA SHEET

FKE...6

The FCX-A IV level transmitter accurately measures liquid levels and transmits a proportional 4-20 mA output signal.

The transmitter uses a unique micro-capacitive silicon sensor in combination with a state-of-the-art digital signal processing to provide exceptional performances in terms of accuracy and stability.

FCX-A IV series of pressure transmitters comply with Safety Integrity Level 2 or 3 according to IEC 61508 and IEC 61511 standards.

FEATURES

1. High accuracy

The Fuji Electric's micro-capacitive sensor provides in standard $\pm 0.165\%$ accuracy for all elevated or suppressed calibration ranges without additional adjustments.

$\pm 0.1\%$ accuracy is available in option.

2. Minimum inventory and design

Electronics parts, local indicators and electronics housing are interchangeable among all FCX-A IV transmitters.

3. Minimum environmental influence

The Advanced Floating Cell technology provides a high immunity against temperature variations, static pressure and overpressure commonly found in the process industry and substantially reduces the overall measurement error.

4. HART 7 communication protocol

FCX-A IV series of pressure transmitters can communicate using the universal HART communication protocol.

By the use of the HART Device Description files, HART compatible devices can communicate with any FCX-A IV transmitter.

5. Application flexibility

Various options are available to address most of the process industry applications, including:

- Full range of hazardous area approvals
- Built-in RFI filter and lightning arrester
- 5 digits local display with engineering units
- Stainless steel electronics housing
- Wide selection of wetted part materials

6. Programmable Output Linearization Function

The output signal can be linearized using up to 14 point pairs.

7. Burnout current flexibility

The burnout current value can be adjusted in the ranges of [3.4 ; 3.8] and [20.8 ; 22.5] mA and can be compliant with NAMUR NE43 recommendations.

8. Contactless local adjustment

An optional local configurator with 3 magnetic switches allows to configure the transmitter without opening the indicator cover (flameproof approvals for hazardous locations). The magnetic pen is required to enable the 3 magnetic switches (Please refer to ACCESSORIES).

FUNCTIONAL SPECIFICATIONS

Type:

FKE: Smart, 4-20 mA with HART communication protocol

Service:

Liquids

Static pressure, span, and range limit:

Model	Static pressure	Span limit [kPa] (mmWC)		Range limit [kPa] (mmWC)
		Min.	Max.	
FKE□□2	Up to flange rating	0.1	6	± 6
		10	600	± 600
FKE□□3		0.32	32	± 32
		32	3200	± 3200
FKE□□5		1.3	130	± 130
		130	13000	± 13000
FKE□□6	5	500	± 500	
	500	50000	± 50000	
FKE□□8	30	3000	± 3000	
	3000	300000	± 300000	

Note: Span higher than 1/10 of the URL is recommended for optimal accuracy.

Lower limit of static pressure: (vacuum limit)

Silicone fill sensor: see fig.1

Fluorinated fill sensor:

66kPa abs (500 mmHg abs) at temperature -20 to 60°C (see fig.2)

Overrange limit:

To maximum static pressure limit

Output signal:

4-20 mA with HART communication protocol.

Power supply:

10.5 to 45 V DC at transmitter terminals.

10.5 to 32 V DC with the optional arrester.

Refer to hazardous location table for specific limitations.

Load limitations: see figure below

Note 1 : The load resistance varies with the upper limit of the saturation current [I max]

$$R [\Omega] = \frac{E [V] - 10.5}{(I \text{ max} [\text{mA}] + 0.9) \times 10^{-3}}$$

Note 2 : For communication with a HART device, a minimum load of 250 Ω is required.

Hazardous locations:

Configuration:

Configuration of the FCX-A IV series of pressure transmitters can be carried out by either using a HART device or the optional local configurator.

A third party HART device can be used in combination with Fuji Electric FCX-A IV HART Device Description files (<https://fieldcommgroup.org>).

Zero and span adjustment:

Zero and span are remotely adjustable by a HART device or locally by the local configurator or the external adjustment screw.

Damping:

The damping time constant can be adjusted within the range of [0.04 to 32] seconds.

Zero elevation/suppression:

±100% of URL

Normal/reverse action:

Selectable by range setting

Local indicator:

Optional 5-digits LCD unit or local configurator with 3 magnetic switches and push-buttons.

A magnetic pen is required to enable this local configurator function.

(Please refer to the ACCESSORIES section.)

Saturation currents:

Lower limit: 3.6 to 4.0mA, Default value: 3.8mA
 Upper limit: 20.0 to 21.6mA, Default value: 20.8mA

Burnout direction and saturation currents:

In the self-diagnostic functions detect a transmitter failure, the burnout function will drive the output signal to either "Output Hold", "Output Overscale" or "Output Underscale" modes.

When "Output Hold":

The output signal is held as the latest value just before the failure happens.

When "Output Overscale":

The output signal is set within the range of [20.8 to 22.5] mA, Default value: 21.6mA

When "Output Underscale":

The output signal is set within the range of [3.4 to 3.8] mA, Default value: 3.6mA

IEC 61511 considerations:

For safety applications, the "Output Hold" MUST NOT be used. Only "Output Overscale" and "Output Underscale" must be used to clearly notify a "failure" state.

**Loop-check/fixed output currents:**

The transmitter can be configured to provide a constant output signal from 3.4 up to 22.5 mA.

Temperature limit:

Ambient

- 40 to +85°C
- 20 to +80°C (with LCD indicator)
- 40 to +60°C (with arrester option)

Please refer to the hazardous locations table for ambient temperature limitations according to the standard and type of protection.

Process:

	Code in the 13th digit of "Model code symbols"	Process temperature	Lower limit of static pressure
Fluorinated oil	W, A and D	-20 to 120°C	67 kPa abs
Silicone oil	Y, G and N	-40 to 150°C	2.7 kPa abs
Silicone oil	V	0 to 150°C	2.7 kPa abs

Note : For higher process temperature, please consult Fuji Electric.

Storage: -40 to +90°C

Humidity limit:

0 to 100% RH (Relative Humidity)

PERFORMANCE SPECIFICATIONS

Reference conditions, silicone filling oil, SS 316L isolating diaphragms, 4-20 mA analog output.

Accuracy rating:

(including linearity, hysteresis, and repeatability)

Standard:

For spans > 1/10 of URL:

$$\pm 0.165\% \text{ of span}$$

For < 1/10 of URL:

$$\pm \left(0.065 + 0.01 \frac{\text{URL}}{\text{Span}} \right) \% \text{ of span}$$

Option:

For spans > 1/10 of URL: $\pm 0.1\%$ of span

For spans < 1/10 of URL:

$$\pm \left(0.05 + 0.005 \frac{\text{URL}}{\text{Span}} \right) \% \text{ of span}$$

Stability:

$\pm 0.2\%$ of Upper range limit (URL) for 10 years.

Temperature effect:

Effects per 28°C change between the limits of -40°C and +85°C

Zero shift (transmitter only): ± 0.3 of URL

Zero shift (level kit only): +0.3 mbar / 28°C

Total effect (level kit and transmitter): $\pm 0.3\%$ of URL

Note:

The indicated values are for temperature compensation made on transmitter only, without level kit.

Zero shift is improved (2 to 3 times) by an additional temperature compensation of the complete level transmitter (level kit and transmitter)

Static pressure effect:

Zero shift: $\pm 0.2\%$ of URL / 1MPa

Double the effects for material code (7th digit in the model code) "H", "M", "T", "B", "P" and "R"

Overrange effect:

Zero shift: $\pm 0.15\%$ of URL (160bar max)

Double the effects for material code (7th digit in the model code) "H", "M", "T", "B", "P" and "R"

Supply voltage effect:

Less than 0.005% of calibrated span per 1 V

Update rate:

40 msec

Turn on time:

6 sec

Response time: (63.3% of output signal without damping)

Range code	Time constant (at 23°C)	Dead time
"3"	550 msec	about 0.06sec
"5" to "8"	300 msec	

Response time = time constant + dead time

Electromagnetic compatibility:

FCX-A IV transmitters are in accordance with the following harmonized standards:

- EN 61326-1
- EN 61326-2-3
- EN 61326-3-1

Mounting position effect:

Zero shift:

Less than 30 mmWC for a 10° tilt in any position (no extension). This error can be corrected by adjusting zero.

(Double the effect for fluorinated fill sensor).

No effect on span.

Vibration effect:

< $\pm 0.25\%$ of span for spans greater than 1/10 of URL.

Frequency 10 to 150 Hz, acceleration 29.4 m/sec².

Dielectric strength:

500 V AC, 50/60 Hz 1 min., between circuit and earth (except with the optional arrester).

Insulation resistance:

More than 100 MΩ at 500 V DC.

Internal resistance for external field indicator:

12 Ω Max (connected to test terminal CK+ and CK-)

Pressure equipment directive (PED) 2014/68/EU:

According to Article 4.3

PHYSICAL SPECIFICATIONS

Conduit connections:

1/2-14 NPT, M20 × 1.5 or Pg13.5

Process connections:

LP side:

Standard: 1/4-18 NPT

Option: 1/2-14 NPT with oval flanges

HP side:

ANSI or DIN raised face flange.

Raised face flange machining:

Stockfinish for SS 316L diaphragm

Smooth finish for other diaphragm material

Process-wetted parts material:

Material code (7th digit in model code)	LP side			HP side
	Process cover	Diaphragm	Wetted sensor body	Diaphragm & flange face
V	SS 316L	SS 316L	SS 316L	SS 316L
C	SS 316L	SS 316L	SS 316L	Hastelloy-C

E	SS 316L	SS 316L	SS 316L	Tantalum
H	SS 316L	Hastelloy-C	Hastelloy-C	Hastelloy-C
M	SS 316L	Monel	Monel	Monel
T	SS 316L	Tantalum	Tantalum	Tantalum
A	SS 316L	SS 316L	SS 316L	SS 316L + PFA lining diaphragm
B	SS 316L	SS 316L	SS 316L	SS 316L + Gold coating
P	SS 316L	SS 316L	SS 316L	Titanium
R	SS 316L	SS 316L	SS 316L	Zirconium

Note: Gasket : Viton O-ring or PTFE/15% graphite square section gasket.

Non-wetted parts material:

Electronics housing:

Low copper die-cast aluminum, finished with polyester coating (standard) or SS 316 as specified.

Bolts and nuts:

Carbon steel (standard), SS 316L or SS 660

Filling fluid:

Silicone oil (standard) for the measuring cell and level kit

Silicone oil (standard) for the measuring cell and fluorinated oil (or specific oils upon request) for the level kit.

Mounting flange: SS 316L

Environmental protection:

IEC IP66 & IP67 and Type 4X

Flange mounting:

See drawings

Mass {weight}:

Transmitter: 10.2 to 19.2 kg without options.

Add: 0.2 kg for indicator

2.0 kg for stainless steel housing (option)

1.0 kg per 50 mm extension of diaphragm

OPTIONAL FEATURES

Local indicator:

An optional 5 digits indicator with engineering units is available.

A local configurator can be carried out using the 3 magnetic switches and push-buttons.

A separately ordered magnet pen is required for adjustment using the magnetic switches.

See the accessories section.

Arrester:

A built-in arrester protects the electronics from lightning surges.

Lightning surge immunity: ±4 kV (1.2 × 50 μs)

Oxygen service:

Special cleaning procedures are applied during the manufacturing process to maintain oil free all process wetted part. The filling fluid is fluorinated oil.

Chlorine service:

Same procedures and filling fluid as for oxygen service.

Degreasing:

Process-wetted parts are cleaned and the filling fluid is standard silicone oil. Not for use with oxygen or chlorine presence.

NACE specification:

Metallic materials for all pressure boundary parts comply with NACE MR 0175/ISO 15156.

SS 660 bolts and nuts comply with NACE MR 0175/ISO 15156.

Optional tag plate:

An extra stainless steel tag with customer tag data is wired to the transmitter.

ACCESSORIES

Oval flange (LP side):

Converts process connection to 1/2-14 NPT

Magnet pen:

To be used with the 3 push-buttons optional indicators.

Order number = ZZP*TQ507742C1

CONNECTION DIAGRAM

Vacuum service:

Special silicone and filling procedure are applied.
